Empowering Businesses

PRODUCTS AND SERVICES

Oranux Consulting follows a well planned agenda for rapid growth and market leadership and to this end we have entered into strategic alliances with the prominent manufacturers/suppliers of a plethora of products and services to meet most needs. We offer once off support services or based on annual support contracts which enables our clients to call us whenever they have an issue covered by the contract.

We help our clients achieve 100% availability on their applications with near Zero Data Loss/Zero Downtime solutions and configurations.

Database Services

- Oracle Data Guard Replication
- Performance Tuning
- Proactive and Reactive Support
- Backup and Recovery Solutions
- Security Solutions
- License Management and Compliance
- Installation and Upgrade Support

DATABASE SUPPORT SERVICES

Since Databases are such critical IT components of any business, it is crucial that the health and the performance of the databases are monitored round the clock and maintained so that they are functioning optimally and efficiently to serve business needs. Oranux Consulting provides you with comprehensive Database Support services that take care of all your database support requirements.
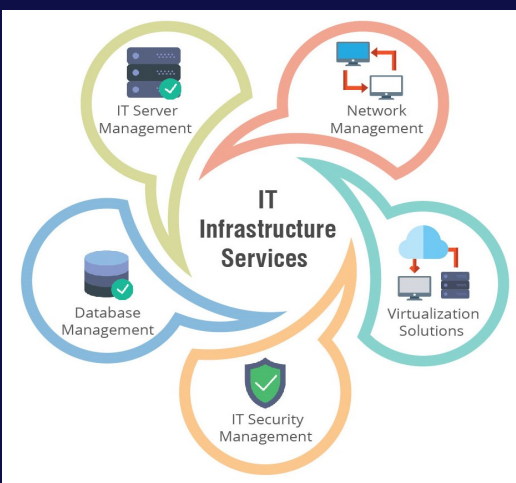

We supply and implement Microsoft and Oracle Databases. We mostly specialize in Oracle Database support services which include Implementations, Proactive and Reactive Support, Performance Tuning, Oracle Data Guard Replication configuration, Backup and Recovery solutions, Security solutions, License Management and compliance, Patching, Trainings etc. We have extensive experience with Oracle Database 9i,10g, 11g, 12c and 19c running on single instance or RAC clusters.

INFRASTRUCTURE SERVICES

IT Infrastructure is the backbone of your entire business operations. It is critical that this backbone operates efficiently and reliably. Implementing and supporting an infrastructure that effectively supports your business takes an organization that knows technology and knows how technology should work. Our experts know both and we have certified consultants to cover each of the various components for your organization (Servers, Networks, Databases, Virtualization, etc.)

Empowering Businesses

- Cisco
- Checkpoint
- F5
- IBM

Oranux Consulting Infrastructure Services offer you a comprehensive end-to-end suite of solutions that are designed to ensure that you reduce your TCO and IT downtime and pushing innovation in your business practices. We provide end to end IT infrastructure services which include supply, implementation and support of Servers, Virtualization, Operating Systems, Enterprise Storage and Networking equipment. We design and manage data centers across heterogeneous platforms. We implement virtualization and data consolidation initiatives.

We offer as-needed support and project-based IT professional services for companies that need valuable IT support when a problem arises. We work as an extension of your team to solve problems when they arise or implement new solutions.

Oranux Consulting goes beyond the basic implementation services provided by many infrastructure support organizations. We take a business-first approach to understand your business and focus on the technology after we understand your current environment, your immediate goals and future plans.

Based on your objectives, our team of expert engineers will implement a full end-to-end infrastructure solution that fits your business' needs and provide on-going support services after the implementation. Our team can provide implementation services and support in the following areas:

- Server Virtualization Solutions from VMWare, Oracle, IBM and Microsoft.
- Servers from Lenovo, HP, IBM, Oracle, Cisco, Dell, etc.
- Enterprise Storages from Netapp, EMC, Oracle, IBM, Lenovo and HP.
- Unix, Linux and Microsoft Operating Systems. (Redhat, AIX, Solaris, etc.)
- Network Products (Switches, Routers, Load Balancers , etc.)
- Backup and Recovery solutions from Acronis, Veeam, IBM, etc.
- Cloud Computing Solutions from IBM, Oracle, Microsoft, etc.
- Security Solutions (Firewall, Vulnerability Assessment, Penetration Testing,etc.)
- Software Development and Implementation
